

CELEBRITY HAIR CORNER

*We had a quick chat with US celebrity stylist **Christopher Smith***

When did you get your big break?

I have had four amazing big breaks! My first break was when I did the Oscars three years ago. My second was when I was a hairdresser for Ebert's Presents. My third would have to be the time I did hair for the Sundance Film Festival, and my last was when I was the main hairstylist for the WorldStar Music Festival in Chicago.

Who's been your favorite celebrity client?

That would have to be Chaz Ebert. She's such a kind, thoughtful, caring woman and very giving. I always receive the best advice from her and I truly look up to her.

What are your thoughts on the natural hair movement?

I absolutely love it! I feel the style gives people more options. We do have great texture to work with which gives us more style options.

What trends are in for summer?

I personally think the technique called baby lights will be in full force! This technique uses your natural highlights, which will create more of a soft look in

the back with more of a heavy look in the front to create a new ombré look. I also hope to see a lot of rose-gold blondes in the summer.

We love the curls you gave your model. Do you have any insider tips to achieving long-lasting curls?

My number one tip is to visit your stylist or salon every week to maintain the style, because when a woman goes to the salon and sits under the dryer with the curlers placed properly in her hair, it will make it easier for her to keep that style, and the curls will last longer. Second to that it's about finding the right products. I feel that products helps women with curly hair maintain a soft and natural curl.

Who is your dream client?

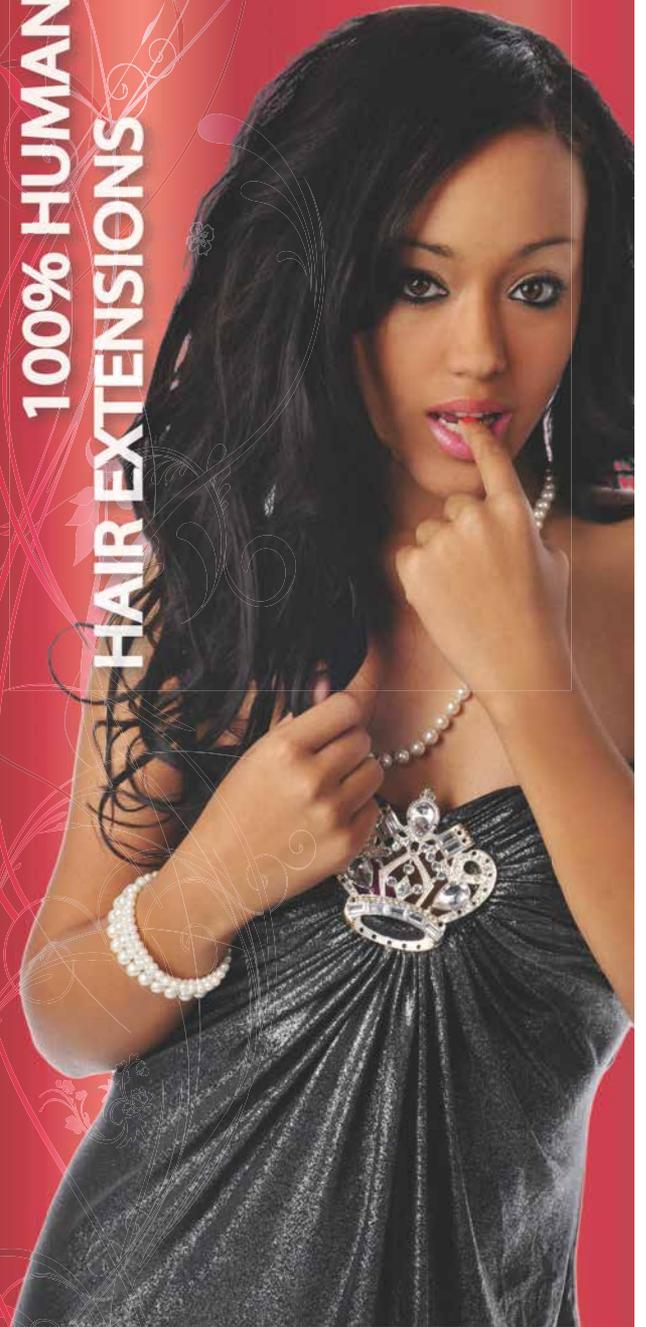

Janet Jackson has always been one of the reasons why I started to do hair! She consistently has a trendy look, and does a complete one-eighty every time you see her.

I feel like she will continue to help me create more fashion-forward looks. **BB&H**
